

## Model 3613 SLC Test Fixture

**Description:** The model 3613 is designed to test C/DF on single layer capacitors (SLC's).

- Built in features to enable precise open and short compensations
- Suitable for testing any size or value of SLC.
- Compliant electrode greatly reduces or eliminates cosmetic marking on the chip.
- It can be used with many capacitance and LCR meters including HP 4278A, Agilent 4288A, Agilent 4268A, Agilent 4263A/B, Keysight E4980A, Keysight E4981A and others.
- Frequency range 1KHz to 1 MHz
- Operating temperature 0°C to 55°C
